
WE'RE LOOKING FOR AN IOS DEVELOPER

JOB DESCRIPTION:

We are creating a new innovation team which will work on Augmented Reality (AR) and Artificial Intelligence (AI) projects to create the future of retail. Our company is going through an expansion phase and we are looking for people who are passionate about coding, detail oriented, and willing to work with an amazing group of professionals on top-notch companies from US.

THE IDEAL PERSON:

- Has a BS in Computer Science or equivalent experience/skills.
- Has work experience on native iOS development (Objective-C and/or Swift), having a good understanding of iOS architecture and solid theoretical knowledge.
- Enjoys tackling problems creatively with good communication skills and is passionate about learning new technologies.
- Has good English communication skills.

BONUS POINTS:

- Has experience in agile development environments (i.e. scrum) using Jira.
- Git.
- C++
- Design tools: InVision / Sketch

RESPONSIBILITIES:

- Define architecture strategies and implement them
- Provide accurate estimations
- Direct communication with international clients

WHAT WE OFFER:

- A result oriented challenging environment
- Excellent working environment

This is a **Full-time** permanent position.

Location: **Montevideo, Uruguay**
