# WE'RE LOOKING FOR AN IMAGE PROCESSING ENGINEER

## **JOB DESCRIPTION:**

We are creating a new innovation team which will work on Augmented Reality (AR) and Artificial Intelligence (AI) projects to create the future of retail. Our company is going through an expansion phase and we are looking for people who are passionate about coding, detail oriented, and willing to work with an amazing group of professionals on top-notch companies from US.

## **THE IDEAL PERSON:**

- Has a BS in Computer Science or Electrical Engineering or equivalent experience/skills (graduate or student)
- Has 3+ years working on image processing.
- Has good English communication skills.
- Has a strong mathematical background.
- Has image processing, computer graphics and/or machine learning education.

## **BONUS POINTS:**

- Knowledge of Git
- Proficient in agile development environments (i.e. Scrum) using Jira.

## **RESPONSIBILITIES:**

### **Research on:**

- How to map image processing algorithms to Skin Products simulation
- Machine learning applied to image processing

### **Development:**

- Image processing algorithms on different platforms
- General speed optimizations
- Provide accurate task estimations
- Generate status reports for the client
- Direct communication with international clients

## **WHAT WE OFFER:**

- A result oriented challenging environment
- Excellent working environment
- Integrate to a R&D oriented team

This is a **Full-time** permanent position.

Location: **Montevideo, Uruguay**
