

## WE'RE LOOKING FOR A C++ DEVELOPER

### **JOB DESCRIPTION:**

We are creating a new innovation team which will work on Augmented Reality (AR) and Artificial Intelligence (AI) projects to create the future of retail. Our company is going through an expansion phase and we are looking for people who are passionate about coding, detail oriented, and willing to work with an amazing group of professionals on top-notch companies from US.

### **THE IDEAL PERSON:**

- Has a BS in Computer Science or equivalent experience/skills
- Has proven experience working with C++
- Has a solid C++ theoretical knowledge and a good understanding of modern C++ code and architecture
- Has an interest in analyzing, building and optimizing high-performance software.
- Has a good knowledge of Git
- Has good English communication skills.

### **BONUS POINTS:**

- Has knowledge of computer graphics and/or image processing.
- Is proficient in agile development environments (i.e. scrum) using Jira.

### **RESPONSIBILITIES:**

- Define architecture strategies and implement them
- Provide accurate task estimations
- Generate status reports for the client
- Direct communication with international clients
- Test, document and debug software to continually improve our product

### **WHAT WE OFFER:**

- A result oriented challenging environment
- Excellent working environment

This is a **Full-time** permanent position.

Location: **Montevideo, Uruguay**
